Class Overview

We're trying something new here. So we're all going to be learning along the way. This is a self-paced class so it's ok if you miss a few sessions or explore more advanced topics on your own.

YOU are very important to us and in an effort to foster and maintain our community we're giving this virtual learning experience a shot. Hopefully it's helpful, but ultimately, the community we create will be influenced by you. So welcome, I'm happy you're here and excited to learn alongside you!

IMPORTANT: I'll be **online every Monday and Wednesday from 3-4pm** to cover new topics, answer questions, and code alongside you. I'll also be online **Fridays from 3-4pm**, to continue coding with you but also to see what YOU've created.

Tech Check
